DETAILED ACTION

Allowable Subject Matter

1. **Claims 1, 5, 9-11, and 21-22 are allowed** which have been re-numbered to as 1, 5, 6, 2, 7, 3 and 4, respectively.

The following is an examiner's statement of reasons for allowance:

Regarding independent **claim 1** , the prior art of record fails to teach or suggest an acoustic signal processing apparatus comprising: an overtone-generating unit generates, under predetermined conditions, one or more overtone components based on each of the divided components that belong to the several frequency bands;

wherein the predetermined conditions include:

a condition that a first maximum degree among one or more degrees of the one or more overtone components generated based on a component belonging to a first frequency band among the several frequency bands is not greater than a second maximum degree among one or more degrees of the one or more overtone components generated based on a component belonging to a second frequency band among the several frequency bands, the second frequency band being lower than the first frequency band; and

a condition that a third maximum degree among one or more degrees of the one or more overtone components generated based on a component belonging to

the highest frequency band among the several frequency bands is less than a fourth maximum degree among one or more degrees of the one or more overtone components generated based on a component belonging to the lowest frequency band among the several frequency bands, in combination with other limitations, as specified in the independent claim 1.

Regarding independent **claim 11**, the prior art of record fails to teach or suggest an acoustic signal processing method comprising: generating, under predetermined conditions, one or more overtone components based on each of the divided components that belong to the several frequency bands;

wherein the predetermined conditions include:

a condition that a first maximum degree among one or more degrees of the one or more overtone components generated based on a component belonging to a first frequency band among the several frequency bands is not greater than a second maximum degree among one or more degrees of the one or more overtone components generated based on a component belonging to a second frequency band among the several frequency bands, the second frequency band being lower than the first frequency band; and

a condition that a third maximum degree among one or more degrees of the one or more overtone components generated based on a component belonging to the highest frequency band among the several frequency bands is less than a fourth maximum degree among one or more degrees of the one or more overtone components

generated based on a component belonging to the lowest frequency band among the several frequency bands, in combination with other limitations, as specified in the independent claim 11.

Claims 5, 9-10, and 21-22 are allowed by virtue of their dependency on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
